

# TECHNICAL DATA

## Specification

Diameter	3/4"
Overall Length	36.0
Quantity	1
Useable Length	31"
Weight	5.0lb
Includes	(1) 3/4 In. x 31 In. x 36 In. SDS-max

## BENEFITS

Long-lasting SDS-max® drill bit design – manufactured with 100% carbide head and four-cutter design for aggressive drilling in reinforced concrete and hard aggregate

Latest diffusion-bonding technology – provides 5X life vs. competition, for the strongest bond available

Four-cutter head design – provides 180° cutting diameter and 100% power transfer during drilling

Four symmetrical 90° side angles – create a wide and sharp tip to aggressively cut through tough materials

Active-centering tip – results in rounder holes for precision-anchoring applications, with a wear margin and diameter tolerance

Bosch-made carbide – advances consistent, quality material; the only concrete bit manufacturer to use 100% carbide

Four-flute design – aggressively pull dust away from the work, keeping the bit tip cooler for longer
