

TECHNICAL DATA

Specification

Diameter	1"
Overall Length	29.0
Quantity	1
Shank Diameter	1.0
Useable Length	24"
Weight	5.0lb
Includes	(1) 1 In. x 24 In. x 29 In. SDS-max®

BENEFITS

Long-lasting SDS-max® drill bit design – manufactured with 100% carbide head and four-cutter design for efficient drilling in reinforced concrete and hard aggregate

Latest diffusion-bonding technology – provides 5X life vs. competition, for the strongest bond available

Four-cutter head design – provides 180° cutting diameter and 100% power transfer during drilling

Four symmetrical 90° side angles – create a wide and sharp tip to aggressively cut through tough materials

Active-centering tip – results in rounder holes for precision-anchoring applications, with a wear margin and diameter tolerance

Bosch-made carbide – advances consistent, quality material; the only concrete bit manufacturer to use

Four-flute design – aggressively pull dust away from the work, keeping the bit tip cooler for longer
