

- Silicon carbide grain
- External fiberglass reinforcement withstands offhand and lateral pressure for added safety and controlled performance
- Versatile diamond (5/8") arbor contains diamond knockout for use on circular saw or worm drive saw
- Type 1/Type 41 shape for square, burr-free cutting

The C24R cutting wheel has a silicon carbide grain to provide a long life. Its external fiberglass reinforcement withstands offhand and lateral pressure for added safety and controlled performance. A versatile diamond arbor contains a diamond-shaped knockout for use on circular saws or worm drive saws. Type 1/Type 41 shape for square, burr-free cutting. Used for stone, brick, soft aggregate, masonry, and concrete. Package of 25. *Note: 20% restock fee on all SAIT/United Abrasives returns.

Series: C24R

Application: Concrete

Arbor: 5/8" - Diamond

Diameter: 7"

Thickness: 3/32"

Material: Silicon Carbide Grain

Type: Type 1

Max RPM: 8,500
