

3M 07524 – Scotch-Brite Roloc Bristle Disc, 2 inch – 50 grit –

Description**Product Description**

- Part Number: 3M 07524
- Size: 2 inch
- Contains: 10 discs
- Grade: Coarse
- Color: Green
- Maximum Operating Speed: 25,000 RPM
- Use with disc pad assembly: **3M 05539**

Disc is a molded, abrasive filled bristle disc instead of wire brushes for automotive use on aluminum and metal. Use for deburring, blending, finishing, polishing, cleaning and for coating, defect, scratch and rust removal. Use with disc pad assembly **3M 05539**.

Super tough plastic bristle brush, embedded with abrasive. Wears as it cleans, continually exposing fresh abrasive. The ideal tool to replace scrapers, wire wheels and chemical gasket stripper. Eliminates the danger of loose wires flying back at the operator. Safer for parts, and safer for the environment than hazardous chemical strippers. Bristles ride over surface cleaning contaminants without gouging surface.
