

7IN1 High-Leverage Combination Pliers

3.9 (7) Write a review

Our 7-in-1 High-Leverage Combination Pliers feature seven core functions for electrical installation. The wide jaw pliers make grabbing and twisting wire easy, while the crimper provides you with added functionality when working with both insulated and non-insulated terminals. The wire cutter, wire stripper, and loop maker allow you to make quick wire preparation. The built-in reamer allows you to ream ½” through 1” conduit, while the bolt cutter cuts #6 and #8 bolts. A swing-lock design delivers fast, one-handed operation, and the high-leverage handles make cutting and crimping easier. The MILWAUKEE® 7-in-1 electrical pliers provide maximum productivity and are perfect for the toughest jobsites.
